	DESIVI SRL	Revision nr. 1
		Dated 26/04/2016
C4110 - LEVANTE - ST	IUCCO NITRO (colori vari)	Printed on 26/04/2016 Page n. 1/19
	Safety data sheet	
SECTION 1. Identification of the subs	stance/mixture and of the company/u	undertaking
1.1. Product identifier		
Code: Product name	C4109, C4110, C4127, C4128, C4135 LEVANTE - STUCCO NITRO (colori vari)	
1.2. Relevant identified uses of the substance or n Intended use	nixture and uses advised against Putty for the marine industry.	
Uses advised against: no one in particular		
1.3. Details of the supplier of the safety data sheet Name Full address District and Country	ILPA ADESIVI SRL Via Ferorelli, 4 70132 BARI (BARI) ITALIA	
	Tel. + 39 0805383837 Fax + 39 0805377807	
e-mail address of the competent person		
responsible for the Safety Data Sheet	aborricelli@ilpa.it	
1.4. Emergency telephone number For urgent inquiries refer to	+ 39 3355405598 (Technical support - 8,00 - 17,00 zone) Safety Executive (HSE) Chemicals Regulation D Road, Bootle, Merseyside. L20 7HS. Phone: +44 151 9513317	
SECTION 2. Hazards identification.		
2.1. Classification of the substance or mixture.		
The product is classified as hazardous pursuant to the supplements). The product thus requires a safety datase Any additional information concerning the risks for healt	heet that complies with the provisions of EC Regulation	on 1907/2006 and subsequent amendments.

Hazard classification and indication:	
Flammable liquid, category 2	H225
Specific target organ toxicity - single exposure, category 3	H336
Hazardous to the aquatic environment, chronic toxicity,	H412
category 3	

Highly flammable liquid and vapour. May cause drowsiness or dizziness. Harmful to aquatic life with long lasting effects.

2.2. Label elements.

Hazard labelling pursuant to EC Regulation 1272/2008 (CLP) and subsequent amendments and supplements.

	ILPA ADESIVI SRL	Revision nr. 1 Dated 26/04/2016
		Printed on 26/04/2016
	24110 - LEVANTE - STUCCO NITRO (colori vari)	Page n. 2/19
Hazard pictograms:		
بلار		
<u>₹</u>		
$\mathbf{\vee}$	\mathbf{V}	
Signal words:	Danger	
Hazard statements:		
H225	Highly flammable liquid and vapour.	
H336 H412	May cause drowsiness or dizziness. Harmful to aquatic life with long lasting effects.	
EUH066	Repeated exposure may cause skin dryness or cracking.	
Precautionary stateme	ents:	
P101	If medical advice is needed, have product container or label at hand.	
P102 P210	Keep out of reach of children. Keep away from heat, hot surfaces, sparks, open flames and other ignition source	es. No smoking.
P233	Keep container tightly closed.	5
P280 P312	Wear protective gloves / eye protection / face protection. Call a POISON CENTER / doctor if you feel unwell.	
P501	Dispose of contents / container to authorized service center	
Contains:	N-BUTYL ACETATE PROPAN-2-OL	
2.3. Other hazards.		
On the basis of availa	ble data, the product does not contain any PBT or vPvB in percentage greater than 0,1%	
SECTION 3 C	omposition/information on ingredients.	

3.1. Substances.

Information not relevant.

3.2. Mixtures.

Contains:

Identification.	Conc. %.	Classification 1272/2008 (CLP).

Note: Upper limit is not included into the range.

The full wording of hazard (H) phrases is given in section 16 of the sheet.

SECTION 4. First aid measures.

4.1. Description of first aid measures.

PROTECTIVE MEASURES FOR THE FIRST RESCUE WORKERS: for PPE (personal protection equipment) required for first aid refer to section 8.2 of this safety data sheet.

EYES: Remove contact lenses, if present. Wash immediately with plenty of water for at least 15 minutes, opening the eyelids fully. If problem persists, seek medical advice.

SKIN: Remove contaminated clothing. Rinse skin with a shower immediately. Get medical advice/attention immediately. Wash contaminated clothing before using it again.

INHALATION: Remove to open air. If the subject stops breathing, administer artificial respiration. Get medical advice/attention immediately. INGESTION: Get medical advice/attention immediately. Do not induce vomiting. Do not administer anything not explicitly authorised by a doctor.

4.2. Most important symptoms and effects, both acute and delayed.

For symptoms and effects caused by the contained substances, see chap. 11.

Revision nr. 1

C4110 - LEVANTE - STUCCO NITRO (colori vari)

Dated 26/04/2016

Printed on 26/04/2016

Page n. 4/19

4.3. Indication of any immediate medical attention and special treatment needed.

Information not available.

SECTION 5. Firefighting measures.

5.1. Extinguishing media.

SUITABLE EXTINGUISHING EQUIPMENT

Extinguishing substances are: carbon dioxide, foam, chemical powder. For product loss or leakage that has not caught fire, water spray can be used to disperse flammable vapours and protect those trying to stem the leak.

UNSUITABLE EXTINGUISHING EQUIPMENT

Do not use jets of water. Water is not effective for putting out fires but can be used to cool containers exposed to flames to prevent explosions.

5.2. Special hazards arising from the substance or mixture.

HAZARDS CAUSED BY EXPOSURE IN THE EVENT OF FIRE Excess pressure may form in containers exposed to fire at a risk of explosion. Do not breathe combustion products.

5.3. Advice for firefighters.

GENERAL INFORMATION

Use jets of water to cool the containers to prevent product decomposition and the development of substances potentially hazardous for health. Always wear full fire prevention gear. Collect extinguishing water to prevent it from draining into the sewer system. Dispose of contaminated water used for extinction and the remains of the fire according to applicable regulations. SPECIAL PROTECTIVE EQUIPMENT FOR FIRE-FIGHTERS

Normal fire fighting clothing i.e. fire kit (BS EN 469), gloves (BS EN 659) and boots (HO specification A29 and A30) in combination with self-contained open circuit positive pressure compressed air breathing apparatus (BS EN 137).

SECTION 6. Accidental release measures.

6.1. Personal precautions, protective equipment and emergency procedures.

Block the leakage if there is no hazard.

Wear suitable protective equipment (including personal protective equipment referred to under Section 8 of the safety data sheet) to prevent any contamination of skin, eyes and personal clothing. These indications apply for both processing staff and those involved in emergency procedures.

6.2. Environmental precautions.

The product must not penetrate into the sewer system or come into contact with surface water or ground water.

6.3. Methods and material for containment and cleaning up.

Collect the leaked product into a suitable container. Evaluate the compatibility of the container to be used, by checking section 10. Absorb the remainder with inert absorbent material.

Revision nr. 1

C4110 - LEVANTE - STUCCO NITRO (colori vari)

Dated 26/04/2016

Printed on 26/04/2016

Page n. 5/19

Make sure the leakage site is well aired. Check incompatibility for container material in section 7. Contaminated material should be disposed of in compliance with the provisions set forth in point 13.

6.4. Reference to other sections.

Any information on personal protection and disposal is given in sections 8 and 13.

SECTION 7. Handling and storage.

7.1. Precautions for safe handling.

Keep away from heat, sparks and naked flames; do not smoke or use matches or lighters. Vapours may catch fire and an explosion may occur; vapour accumulation is therefore to be avoided by leaving windows and doors open and ensuring good cross ventilation. Without adequate ventilation, vapours may accumulate at ground level and, if ignited, catch fire even at a distance, with the danger of backfire. Avoid bunching of electrostatic charges. When performing transfer operations involving large containers, connect to an earthing system and wear antistatic footwear. Vigorous stirring and flow through the tubes and equipment may cause the formation and accumulation of electrostatic charges. In order to avoid the risk of fires and explosions, never use compressed air when handling. Open containers with caution as they may be pressurised. Do not eat, drink or smoke during use. Avoid leakage of the product into the environment.

7.2. Conditions for safe storage, including any incompatibilities.

Store only in the original container. Store the containers sealed, in a well ventilated place, away from direct sunlight. Store in a well ventilated place, keep far away from sources of heat, naked flames and sparks and other sources of ignition. Keep containers away from any incompatible materials, see section 10 for details.

7.3. Specific end use(s).

No use other than specified in Section 1.2 of this safety data sheet.

SECTION 8. Exposure controls/personal protection.

8.1. Control parameters.

Legend:

VND = hazard identified but no DNEL/PNEC available ; NEA = no exposure expected ; NPI = no hazard identified.

XYLENI: Biological Exposure Indices (IBE): Hippuric Acid in urine: 1.5 g/g creatinina. Sampling time: End of shift. (ACGIH 2014).

ETHYLBENZENE: Biological Exposure Indices (IBE): mandelic acid + phenylglyoxylic acid in urine: 0,7 g/g creatinine. Sampling time: End of shift (ACGIH 2014)

ethylbenzene end-expiratory air: not critical (ACGIH 2014).

8.2. Exposure controls.

As the use of adequate technical equipment must always take priority over personal protective equipment, make sure that the workplace is well aired through effective local aspiration. Personal protective equipment must be CE marked, showing that it complies with applicable standards.

HAND PROTECTION

Protect hands with category III work gloves (see standard EN 374).

The following should be considered when choosing work glove material: compatibility, degradation, failure time and permeability.

The work gloves' resistance to chemical agents should be checked before use, as it can be unpredictable. The gloves' wear time depends on the duration and type of use.

SKIN PROTECTION

Wear category I professional long-sleeved overalls and safety footwear (see Directive 89/686/EEC and standard EN ISO 20344). Wash body with soap and water after removing protective clothing.

Consider the appropriateness of providing antistatic clothing in the case of working environments in which there is a risk of explosion.

EYE PROTECTION

Wear airtight protective goggles (see standard EN 166).

RESPIRATORY PROTECTION

If the threshold value (e.g. TLV-TWA) is exceeded for the substance or one of the substances present in the product, wear a mask with a type AX filter, whose limit of use will be defined by the manufacturer (see standard EN 14387). In the presence of gases or vapours of various kinds and/or gases or vapours containing particulate (aerosol sprays, fumes, mists, etc.) combined filters are required.

Respiratory protection devices must be used if the technical measures adopted are not suitable for restricting the worker's exposure to the threshold values considered. The protection provided by masks is in any case limited.

If the substance considered is odourless or its olfactory threshold is higher than the corresponding TLV-TWA and in the case of an emergency, wear open-circuit compressed air breathing apparatus (in compliance with standard EN 137) or external air-intake breathing apparatus (in compliance with standard EN 138). For a correct choice of respiratory protection device, see standard EN 529.

ENVIRONMENTAL EXPOSURE CONTROLS.

The emissions generated by manufacturing processes, including those generated by ventilation equipment, should be checked to ensure compliance with environmental standards.

Product residues must not be indiscriminately disposed of with waste water or by dumping in waterways.

SECTION 9. Physical and chemical properties.

9.1. Information on basic physical and chemical properties.

Appearance paste Colour various Odour aromatic Odour threshold. 0,7 ppm (N-BUTYL ACETATE) pH. Not applicable. Melting point / freezing point. <-90°C (N-BUTYL ACETATE) Initial boiling point. > 35 °C. Not available. Boiling range. Flash point. < 23 °C. Evaporation rate 1 (butyl acetate=1) (N-BUTYL ACETATE) Flammability (solid, gas) Not applicable. Lower inflammability limit. 1,7 (in air Vol%) (N-BUTYL ACETATE) Upper inflammability limit. 7,6 (in air Vol%) (N-BUTYL ACETATE) 1,2 (in air Vol%) (ICSC 0399) (N-BUTYL ACETATE) Lower explosive limit. Upper explosive limit. 7,6 (in air Vol%) (ICSC 0399) (N-BUTYL ACETATE) Vapour pressure. 11,2 hPa (T=20°C) (N-BUTYL ACETATE) Vapour density 4 (air=1) (ICSC 0399) (N-BUTYL ACETATE) Relative density. 1,700 Kg/l Solubility insoluble in water 2,3 Log Pow (T=25°C) (N-BUTYL ACETATE) Partition coefficient: n-octanol/water Auto-ignition temperature. 415 (1010 hPa) (N-BUTYL ACETATE) Not available. Decomposition temperature. Viscosity 800 ± 50 Pas (T = 25 °C) Explosive properties Not available. Oxidising properties Not available.

9.2. Other information.

VOC (Directive 2010/75/EC) :	40,38 %	-	525,00	g/litre.
VOC (volatile carbon) :	17,63 %	-	299,72	g/litre.

SECTION 10. Stability and reactivity.

10.1. Reactivity.

There are no particular risks of reaction with other substances in normal conditions of use.

NITROCELLULOSE: high risk of fire in dry state, if exposed to heat, flames or strong oxidising agents. Decomposes under the effect of heat. N-BUTYL ACETATE: decomposes readily with water, especially when warm.

10.2. Chemical stability.

The product is stable in normal conditions of use and storage.

10.3. Possibility of hazardous reactions.

The vapours may also form explosive mixtures with the air.

Revision nr. 1

C4110 - LEVANTE - STUCCO NITRO (colori vari)

Dated 26/04/2016

Printed on 26/04/2016

Page n. 12/19

XYLENE (MIXTURE OF ISOMERS): stable, but may develop violent reactions in the presence of strong oxidising agents such as sulphuric and nitric acids and perchlorates. May form explosive mixtures with the air.

ETHYLBENZENE: reacts violently with strong oxidising agents and attacks various types of plastics. Can form explosive mixtures with the air.

NITROCELLULOSE: risk of explosion under the effect of heat, blows and rubbing. N-BUTYL ACETATE: risk of explosion on contact with: strong oxidising agents. Can react dangerously with alkaline hydroxides, potassium tert-butoxide. Forms explosive mixtures with the air.

10.4. Conditions to avoid.

Avoid overheating. Avoid bunching of electrostatic charges. Avoid all sources of ignition.

N-BUTYL ACETATE: avoid exposure to moisture, sources of heat and naked flames.

10.5. Incompatible materials.

NITROCELLULOSA: evitare il contatto con acidi, ammine, basi, sali metallici, sostanze riducenti e ossidanti. N-BUTYL ACETATE: water, nitrates, strong oxidising agents, acids and alkalis and potassium tert-butoxide.

10.6. Hazardous decomposition products.

In the event of thermal decomposition or fire, gases and vapours that are potentially dangerous to health may be released.

ETHYLBENZENE: methane, styrene, hydrogen, ethane. NITROCELLULOSE: nitric oxides.

SECTION 11. Toxicological information.

In the absence of experimental data for the product itself, health hazards are evaluated according to the properties of the substances it contains, using the criteria specified in the applicable regulation for classification. It is therefore necessary to take into account the concentration of the individual hazardous substances indicated in section 3, to evaluate the toxicological effects of exposure to the product.

This product contains highly volatile substances, which may cause serious depression of the central nervous system (CNS) and have negative effects, such as drowsiness, dizziness, slow reflexes, narcosis.

This product may have a degreasing action on the skin, producing dryness and chapped skin after repeated exposure.

11.1. Information on toxicological effects.

Data refers to the mix:

ACUTE TOXICITY: No data available SKIN CORROSION/IRRITATION: No data available SERIOUS EYE DAMAGE/IRRITATION: No data available RESPIRATORY OR SKIN SENSITISATION: No data available GERM CELL MUTAGENICITY: No data available CARCINOGENICITY: No data available REPRODUCTIVE TOXICITY: No data available STOT-SINGLE EXPOSURE: May cause drowsiness or dizziness. (section 3.2 of the safety data sheet) STOT-REPEATED EXPOSURE: Repeated exposure may cause skin dryness or cracking. (section 3.2 of the safety data sheet) ASPIRATION HAZARD: not relevant to viscosity values (section 9 of the safety data sheet)

Data relating to substances hazardous mixture:

XYLENE (MIXTURE OF ISOMERS): has a toxic effect on the CNS (encephalopathies). Irritating to the skin, conjunctivae, cornea and respiratory apparatus.

ACUTE TOXICITY:

	12.5. Results of PBT and vPvB assessment.	
1		

On the basis of available data, the product does not contain any PBT or vPvB in percentage greater than 0,1%.

12.6. Other adverse effects.

Information not available.

SECTION 13. Disposal considerations.

13.1. Waste treatment methods.

Reuse, when possible. Product residues should be considered special hazardous waste. The hazard level of waste containing this product should be evaluated according to applicable regulations.

Disposal must be performed through an authorised waste management firm, in compliance with national and local regulations.

Waste transportation may be subject to ADR restrictions.

CONTAMINATED PACKAGING

Contaminated packaging must be recovered or disposed of in compliance with national waste management regulations.

15.2. Chemical safety assessment.			
No chemical safety assessment has been processed for the mixture and the substances it contains.			
to chemical safety assessment has been processed for the mixture and the substances it contains.			
SECTION 16. Other inform	nation.		

Text of hazard (H) indications mentioned in section 2-3 of the sheet:

Flam. Liq. 2

Flammable liquid, category 2

C4110 - LEVANTE - STUCCO NITRO (colori vari)

Revision nr. 1

Page n. 18/19

Dated 26/04/2016

Printed on 26/04/2016

Flam. Liq. 3	Flammable liquid, category 3			
Flam. Sol. 1	Flammable solid, category 1			
Acute Tox. 4	Acute toxicity, category 4			
Asp. Tox. 1	Aspiration hazard, category 1			
STOT RE 2	Specific target organ toxicity - repeated exposure, category 2			
Eye Irrit. 2	Eye irritation, category 2			
Skin Irrit. 2	Skin irritation, category 2			
STOT SE 3	Specific target organ toxicity - single exposure, category 3			
Aquatic Acute 1	Hazardous to the aquatic environment, acute toxicity, category 1			
Aquatic Chronic 1	Hazardous to the aquatic environment, chronic toxicity, category 1			
Aquatic Chronic 3	Hazardous to the aquatic environment, chronic toxicity, category 3			
H225	Highly flammable liquid and vapour.			
H226	Flammable liquid and vapour.			
H228	Flammable solid.			
H312	Harmful in contact with skin.			
H332	Harmful if inhaled.			
H304	May be fatal if swallowed and enters airways.			
H373	May cause damage to organs through prolonged or repeated exposure.			
H319	Causes serious eye irritation.			
H315	Causes skin irritation.			
H335	May cause respiratory irritation.			
H336	May cause drowsiness or dizziness.			
H400	Very toxic to aquatic life.			
H410	Very toxic to aquatic life with long lasting effects.			
H412	Harmful to aquatic life with long lasting effects.			
EUH066	Repeated exposure may cause skin dryness or cracking.			
LEGEND: - ADR: European Agreement concerning the carriage of Dangerous goods by Road - CAS NUMBER: Chemical Abstract Service Number - CE50: Effective concentration (required to induce a 50% effect) - CE NUMBER: Identifier in ESIS (European archive of existing substances) - CLP: EC Regulation 1272/2008 - DNEL: Derived No Effect Level - EmS: Emergency Schedule - GHS: Globally Harmonized System of classification and labeling of chemicals - IATA DGR: International Air Transport Association Dangerous Goods Regulation - IC50: Immobilization Concentration 50%				

- IC50: Immobilization Concentration 50%
- IMDG: International Maritime Code for dangerous goods
- IMO: International Maritime Organization
- INDEX NUMBER: Identifier in Annex VI of CLP
- LC50: Lethal Concentration 50%
- LD50: Lethal dose 50%

L

- OEL: Occupational Exposure Level
- PBT: Persistent bioaccumulative and toxic as REACH Regulation PEC: Predicted environmental Concentration
- PEL: Predicted exposure level
- PNEC: Predicted no effect concentration
- REACH: EC Regulation 1907/2006
- RID: Regulation concerning the international transport of dangerous goods by train
- TLV: Threshold Limit Value
- TLV CEILING: Concentration that should not be exceeded during any time of occupational exposure.
- TWA STEL: Short-term exposure limit
- TWA: Time-weighted average exposure limit
- VOC: Volatile organic Compounds

C4110 - LEVANTE - STUCCO NITRO (colori vari)

ILPA ADESIVI SRL

Revision nr. 1

Dated 26/04/2016

Printed on 26/04/2016 Page n. 19/19

vPvB: Very Persistent and very Bioaccumulative as for REACH Regulation - WGK: Water hazard classes (German).

Note for users:

The information contained in the present sheet are based on our own knowledge on the date of the last version. Users must verify the suitability and thoroughness of provided information according to each specific use of the product.

This document must not be regarded as a guarantee on any specific product property.

The use of this product is not subject to our direct control; therefore, users must, under their own responsibility, comply with the current health and safety laws and regulations. The producer is relieved from any liability arising from improper uses. Provide appointed staff with adequate training on how to use chemical products.

Training for workers:

Worker training should include content, updates and duration depending on the risk profiles assigned to the business sectors they belong.

Classification according to Regulation (EC) Nr. 1272/2008
