| SECTION 2. Hazards identificati | on. | | |
| 2.1. Classification of the substance or mixt | Jre. | | |
| ne product is classified as hazardous pursua upplements). The product thus requires a safet ny additional information concerning the risks f | y datasheet that complies with | the provisions of EC Regula | ation 1907/2006 and subsequent amendments |
| azard classification and indication: | L1005 | Highly flormoble | liquid and vanour |
| Flammable liquid, category 2 Reproductive toxicity, category 2 | H225 H361 | Suspected of dan | liquid and vapour. naging fertility or the unborn child. |
| Aspiration hazard, category 1 Specific target organ toxicity - repeated exposit | H304 ure, category 2 H373 | | rallowed and enters airways. ge to organs through prolonged or repeated |

| Eye irritation, category 2 Skin irritation, category 2 | H319 H315 |
|--------------------------------------------------------------------|--------------|
| Specific target organ toxicity - single exposure, category 3 | H336 |
| Hazardous to the aquatic environment, chronic toxicity, category 2 | H411 |

May be fatal if swallowed and enters airways. May cause damage to organs through prolonged or repeated exposure. Causes serious eye irritation. Causes skin irritation. May cause drowsiness or dizziness. Toxic to aquatic life with long lasting effects.

C7118 - MAX - DILUENTE ANTISILICONICO

Dated 21/07/2016

Revision nr. 1

Page n. 2/16

Printed on 25/07/2016

2.2. Label elements.

Hazard labelling pursuant to EC Regulation 1272/2008 (CLP) and subsequent amendments and supplements.

Hazard pictograms:

Signal words:

Danger

Hazard statements:

| H225 | Highly flammable liquid and vapour. |
|------|--------------------------------------------------------------------|
| H361 | Suspected of damaging fertility or the unborn child. |
| H304 | May be fatal if swallowed and enters airways. |
| H373 | May cause damage to organs through prolonged or repeated exposure. |
| H319 | Causes serious eye irritation. |
| H315 | Causes skin irritation. |
| H336 | May cause drowsiness or dizziness. |
| H411 | Toxic to aquatic life with long lasting effects. |

Precautionary statements:

| P201 P210 P260 P280 P308+P313 | Obtain special instructions before use. Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking. Do not breathe dust / fume / gas / mist / vapours / spray. Wear protective gloves / eye protection / face protection. IF exposed or concerned: Get medical advice / attention. |
|-------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| P370+P378 | In case of fire: use carbon dioxide, foam, chemical powder to extinguish. |
| Contains: | HEXANE ETHYL ACETATE |

HYDROCARBONS, C9, AROMATICS

2.3. Other hazards.

On the basis of available data, the product does not contain any PBT or vPvB in percentage greater than 0,1%.

SECTION 3. Composition/information on ingredients.

3.1. Substances.

Information not relevant.

3.2. Mixtures.

Contains:

Identification.

Conc. %.

Classification 1272/2008 (CLP).

Note: Upper limit is not included into the range.

The full wording of hazard (H) phrases is given in section 16 of the sheet.

SECTION 4. First aid measures.

4.1. Description of first aid measures.

EYES: Remove contact lenses, if present. Wash immediately with plenty of water for at least 15 minutes, opening the eyelids fully. If problem persists, seek medical advice.

SKIN: Remove contaminated clothing. Rinse skin with a shower immediately. Get medical advice/attention immediately. Wash contaminated clothing before using it again.

INHALATION: Remove to open air. If the subject stops breathing, administer artificial respiration. Get medical advice/attention immediately. INGESTION: Get medical advice/attention immediately. Do not induce vomiting. Do not administer anything not explicitly authorised by a doctor.

PROTECTIVE MEASURES FOR THE FIRST RESCUE WORKERS: for PPE (personal protection equipment) required for first aid refer to section 8.2 of this safety data sheet.

4.2. Most important symptoms and effects, both acute and delayed.

For symptoms and effects caused by the contained substances, see chap. 11.

4.3. Indication of any immediate medical attention and special treatment needed.

Information not available.

C7118 - MAX - DILUENTE ANTISILICONICO

Revision nr. 1

Dated 21/07/2016

Printed on 25/07/2016

Page n. 4/16

SECTION 5. Firefighting measures.

5.1. Extinguishing media.

SUITABLE EXTINGUISHING EQUIPMENT

Extinguishing substances are: carbon dioxide, foam, chemical powder. For product loss or leakage that has not caught fire, water spray can be used to disperse flammable vapours and protect those trying to stem the leak.

UNSUITABLE EXTINGUISHING EQUIPMENT

Do not use jets of water. Water is not effective for putting out fires but can be used to cool containers exposed to flames to prevent explosions.

5.2. Special hazards arising from the substance or mixture.

HAZARDS CAUSED BY EXPOSURE IN THE EVENT OF FIRE Excess pressure may form in containers exposed to fire at a risk of explosion. Do not breathe combustion products.

5.3. Advice for firefighters.

GENERAL INFORMATION

Use jets of water to cool the containers to prevent product decomposition and the development of substances potentially hazardous for health. Always wear full fire prevention gear. Collect extinguishing water to prevent it from draining into the sewer system. Dispose of contaminated water used for extinction and the remains of the fire according to applicable regulations.

SPECIAL PROTECTIVE EQUIPMENT FOR FIRE-FIGHTERS

Normal fire fighting clothing i.e. fire kit (BS EN 469), gloves (BS EN 659) and boots (HO specification A29 and A30) in combination with self-contained open circuit positive pressure compressed air breathing apparatus (BS EN 137).

SECTION 6. Accidental release measures.

6.1. Personal precautions, protective equipment and emergency procedures.

Block the leakage if there is no hazard.

Wear suitable protective equipment (including personal protective equipment referred to under Section 8 of the safety data sheet) to prevent any contamination of skin, eyes and personal clothing. These indications apply for both processing staff and those involved in emergency procedures.

6.2. Environmental precautions.

The product must not penetrate into the sewer system or come into contact with surface water or ground water.

6.3. Methods and material for containment and cleaning up.

Collect the leaked product into a suitable container. Evaluate the compatibility of the container to be used, by checking section 10. Absorb the remainder with inert absorbent material.

Make sure the leakage site is well aired. Check incompatibility for container material in section 7. Contaminated material should be disposed of in compliance with the provisions set forth in point 13.

6.4. Reference to other sections.

Any information on personal protection and disposal is given in sections 8 and 13.

C7118 - MAX - DILUENTE ANTISILICONICO

Revision nr. 1

Dated 21/07/2016

Printed on 25/07/2016

Page n. 5/16

SECTION 7. Handling and storage.

7.1. Precautions for safe handling.

Keep away from heat, sparks and naked flames; do not smoke or use matches or lighters. Vapours may catch fire and an explosion may occur; vapour accumulation is therefore to be avoided by leaving windows and doors open and ensuring good cross ventilation. Without adequate ventilation, vapours may accumulate at ground level and, if ignited, catch fire even at a distance, with the danger of backfire. Avoid bunching of electrostatic charges. When performing transfer operations involving large containers, connect to an earthing system and wear antistatic footwear. Vigorous stirring and flow through the tubes and equipment may cause the formation and accumulation of electrostatic charges. In order to avoid the risk of fires and explosions, never use compressed air when handling. Open containers with caution as they may be pressurised. Do not eat, drink or smoke during use. Avoid leakage of the product into the environment.

7.2. Conditions for safe storage, including any incompatibilities.

Store only in the original container. Store the containers sealed, in a well ventilated place, away from direct sunlight. Store in a well ventilated place, keep far away from sources of heat, naked flames and sparks and other sources of ignition. Keep containers away from any incompatible materials, see section 10 for details.

7.3. Specific end use(s).

No use other than specified in Section 1.2 of this safety data sheet.

SECTION 8. Exposure controls/personal protection.

8.1. Control parameters.

VND = hazard identified but no DNEL/PNEC available ; NEA = no exposure expected ; NPI = no hazard identified.

8.2. Exposure controls.

As the use of adequate technical equipment must always take priority over personal protective equipment, make sure that the workplace is well aired through effective local aspiration. Personal protective equipment must be CE marked, showing that it complies with applicable standards.

Provide an emergency shower with face and eye wash station.

Exposure levels must be kept as low as possible to avoid significant build-up in the organism. Manage personal protective equipment so as to guarantee maximum protection (e.g. reduction in replacement times).

HAND PROTECTION

Revision nr. 1

Page n. 8/16

C7118 - MAX - DILUENTE ANTISILICONICO

Dated 21/07/2016

Printed on 25/07/2016

Protect hands with category III work gloves (see standard EN 374).

The following should be considered when choosing work glove material: compatibility, degradation, failure time and permeability. The work gloves' resistance to chemical agents should be checked before use, as it can be unpredictable. The gloves' wear time depends on the duration and type of use.

SKIN PROTECTION

Wear category II professional long-sleeved overalls and safety footwear (see Directive 89/686/EEC and standard EN ISO 20344). Wash body with soap and water after removing protective clothing.

Consider the appropriateness of providing antistatic clothing in the case of working environments in which there is a risk of explosion.

EYE PROTECTION

Wear airtight protective goggles (see standard EN 166).

RESPIRATORY PROTECTION

If the threshold value (e.g. TLV-TWA) is exceeded for the substance or one of the substances present in the product, wear a mask with a type AX filter, whose limit of use will be defined by the manufacturer (see standard EN 14387). In the presence of gases or vapours of various kinds and/or gases or vapours containing particulate (aerosol sprays, fumes, mists, etc.) combined filters are required.

Respiratory protection devices must be used if the technical measures adopted are not suitable for restricting the worker's exposure to the threshold values considered. The protection provided by masks is in any case limited.

If the substance considered is odourless or its olfactory threshold is higher than the corresponding TLV-TWA and in the case of an emergency, wear open-circuit compressed air breathing apparatus (in compliance with standard EN 137) or external air-intake breathing apparatus (in compliance with standard EN 138). For a correct choice of respiratory protection device, see standard EN 529.

ENVIRONMENTAL EXPOSURE CONTROLS.

The emissions generated by manufacturing processes, including those generated by ventilation equipment, should be checked to ensure compliance with environmental standards.

Product residues must not be indiscriminately disposed of with waste water or by dumping in waterways.

SECTION 9. Physical and chemical properties.

9.1. Information on basic physical and chemical properties.

C7118 - MAX - DILUENTE ANTISILICONICO

Revision nr. 1

Dated 21/07/2016

Printed on 25/07/2016 Page n. 9/16

9.2. Other information.

| VOC (Directive 2004/42/EC) : | 100,00 % - | 710,00 | g/litre. |
|------------------------------|----------------|--------|----------|
| VOC (volatile carbon) : | Not available. | | - |

SECTION 10. Stability and reactivity.

10.1. Reactivity.

There are no particular risks of reaction with other substances in normal conditions of use.

ETHYL ACETATE: decomposes slowly into acetic acid and ethanol under the effect of light, air and water.

10.2. Chemical stability.

The product is stable in normal conditions of use and storage.

10.3. Possibility of hazardous reactions.

The vapours may also form explosive mixtures with the air.

ETHYL ACETATE: risk of explosion on contact with: metals, alkalis, hydrides. oleum. can react violently with: fluoride, strong oxidising agents, chlorosulfuric acid, potassium tert-butoxide. Forms explosive mixtures with the air.

10.4. Conditions to avoid.

Avoid overheating. Avoid bunching of electrostatic charges. Avoid all sources of ignition.

ETHYL ACETATE: avoid exposure to light, sources of heat and naked flames.

10.5. Incompatible materials.

ETHYL ACETATE: acids and bases, strong oxidising agents; aluminium and some plastics, nitrates and chlorosulphuric acid.

10.6. Hazardous decomposition products.

In the event of thermal decomposition or fire, gases and vapours that are potentially dangerous to health may be released.

SECTION 11. Toxicological information.

In the absence of experimental data for the product itself, health hazards are evaluated according to the properties of the substances it contains, using the criteria specified in the applicable regulation for classification. It is therefore necessary to take into account the concentration of the individual hazardous substances indicated in section 3, to evaluate the toxicological effects of exposure to the product.

This product must be handled carefully because of its possible teratogenic effects, which may reduce human fertility or because of its possible teratogenic effects, which may be toxic and damage the foetus development.

The introduction of even small quantities of this liquid into the respiratory system in case of ingestion or vomit may cause bronchopneumonia and

Revision nr. 1

Page n. 10/16

C7118 - MAX - DILUENTE ANTISILICONICO

Dated 21/07/2016

Printed on 25/07/2016

pulmonary edema.

This product may cause functional disorders or morphological mutations after repeated or prolonged exposure and/or may accumulate inside the human body and is thus graded as dangerous.

Acute effects: stinging eyes. Symptoms may include: rubescence, edema, pain and lachrymation. Ingestion may cause health problems, including stomach pain and sting, nausea and sickness.

Acute effects: contact with skin may cause: irritation, erythema, edema, dryness and chapped skin. Ingestion may cause health disorders, including stomach pain and sting, nausea and sickness.

This product contains highly volatile substances, which may cause serious depression of the central nervous system (CNS) and have negative effects, such as drowsiness, dizziness, slow reflexes, narcosis.

11.1. Information on toxicological effects.

Data refers to the mix:

ACUTE TOXICITY: No data available SKIN CORROSION/IRRITATION: Causes skin irritation (section 3.2 of the safety data sheet) SERIOUS EYE DAMAGE/IRRITATION: Causes serious eye irritation (section 3.2 of the safety data sheet) RESPIRATORY OR SKIN SENSITISATION: No data available GERM CELL MUTAGENICITY: No data available CARCINOGENICITY: No data available REPRODUCTIVE TOXICITY: Suspected of damaging fertility or the unborn child (section 3.2 of the safety data sheet). STOT-SINGLE EXPOSURE: May cause drowsiness or dizziness. (section 3.2 of the safety data sheet) STOT-REPEATED EXPOSURE: Causes damage to organs through prolonged or repeated exposure (section 3.2 of the safety data sheet) ASPIRATION HAZARD: May be fatal if swallowed and enters airways. (section 3.2 of the safety data sheet) **Data relating to substances hazardous mixture:**

Data relating to substances nazardous mixi

ETHYL ACETATE

ACUTE TOXICITY: LD50 (Oral).4934 mg/kg Rabbit (Equivalent to OECD 401) LD50 (Dermal).20000 mg/kg Rabbit (Publication Am Ind Hyg Ass J, 23, 95) LC50 (Inhalation).22,5 mg/l/6h Rat (40 CFR Part 799 (58 FR 40262)) SKIN CORROSION/IRRITATION: Skin slightly irritating (Rabbit, OECD 404) SERIOUS EYE DAMAGE/IRRITATION: irritating to eyes (Annex VI, REGULATION (EC) No 1272/2008). RESPIRATORY OR SKIN SENSITISATION: not sensitizing (Guinea pig, OECD Guideline 406) GERM CELL MUTAGENICITY: negative, (Hamster, Equivalent or similar to OECD Guideline 474) CARCINOGENICITY: No data available. REPPRODUCTIVE TOXICITY: NOAEL = 26400 mg/kg (Mouse, Read-across from supporting substance, equivalent or similar to OECD Guideline 416) STOT-SINGLE EXPOSURE: It can cause respiratory irritation (Annex VI, REGULATION (EC) No 1272/2008). STOT-REPEATED EXPOSURE: Orale: NOAEL = 900 mg/kg bw/day (Rat, Equivalent or similar to EPA OTS 795.2600, GLP) Inalation: NOAEL = 350 ppm (Rat, EPA OTS 798.2450, GLP) ASPIRATION HAZARD: May be fatal if swallowed and enters airways. (Annex VI, REGULATION (EC) No 1272/2008).

HYDROCARBONS, C9, AROMATICS

ACUTE TOXICITY:

LD50 (Oral).3492 mg/kg Rat (Study report ECHA)

LD50 (Dermal).3160 mg/kg Rabbit (Equivalent or similar to OECD Guideline 402)

LC50 (Inhalation).6193 ppm/4h Rat (Equivalent or similar to OECD Guideline 403, GLP)

SKIN CORROSION/IRRITATION: Causes skin irritation. (Ref. SDS supplier)

SERIOUS EYE DAMAGE/IRRITATION: Causes eye irritation. (Ref. SDS supplier)

STOT-SINGLE EXPOSURE: May cause respiratory irritation and ay cause drowsiness or dizziness. (Ref. SDS supplier)

ASPIRATION HAZARD: May be fatal if swallowed and enters airways. (Ref. SDS supplier).

HEXANE

ACUTE TOXICITY: LD50 (Oral).> 16750 mg/kg rat, equivalent or similar to (OECD Guideline 401) LD50 (Dermal).> 3350 mg/kg rabbit, equivalent or similar to (OECD Guideline 402) LC50 (Inhalation).73860 ppm/4h rat, equivalent or similar to (OECD Guideline 403)

SECTION 12. Ecological information.

This product is dangerous for the environment and is toxic for aquatic organisms. In the long term, it have negative effects on acquatic environment.

Revision nr. 1

C7118 - MAX - DILUENTE ANTISILICONICO

Dated 21/07/2016

Printed on 25/07/2016 Page n. 11/16

12.1. Toxicity.

| ETHYL ACETATE | |
|-----------------------------|-----------------------------------------------------------------|
| LC50 - for Fish. | 230 mg/l/96h Pimephales promelas (US EPA method E03-05) |
| EC50 - for Crustacea. | 165 mg/l/48h Dapnia (Rif. SDS fornitore) |
| Chronic NOEC for Crustacea. | 100 mg/l Scenedesmus subspicatus (OECD Guideline 201, GLP) |
| HYDROCARBONS, C9, AROMATICS | |
| LC50 - for Fish. | 9,2 mg/l/96h Oncorhynchus mykiss (OECD Guideline 203, GLP) |
| EC50 - for Crustacea. | 3,2 mg/l/48h Daphnia magna (OECD Guideline 202, GLP) |
| | 2,6 mg/l/72h Raphidocelis subcapitata (OECD Guideline 201, GLP) |

12.2. Persistence and degradability.

The paraffinic hydrocarbons fraction may be considered biodegradable in water and in air. They distribute mostly in the air. The small non biodegradable amount which spreads into water tends to accumulate in fish. HEXANE: the paraffin hydroarbons present can be considered degradable in the water and air. They primarily distribute in the air. The little that distributes in water and does not biodegrade tends to accumulate in fish.

HEXANE

k

Rapidly biodegradable.

| ETHYL ACETATE | |
|-----------------------------------|--------------|
| Solubility in water. | > 10000 mg/l |
| Rapidly biodegradable. | |
| (Publication JWPCF 46(1), p63-77) | |

HYDROCARBONS, C9, AROMATICS

Rapidly biodegradable.

Biodegradazione 78% in 28 d (OECD Guideline 301 F)

12.3. Bioaccumulative potential.

| HEXANE BCF. | 501187 |

On the basis of available data, the product does not contain any PBT or vPvB in percentage greater than 0,1%.

12.6. Other adverse effects.

Information not available.

SECTION 13. Disposal considerations.

13.1. Waste treatment methods.

Reuse, when possible. Product residues should be considered special hazardous waste. The hazard level of waste containing this product should be evaluated according to applicable regulations.

Disposal must be performed through an authorised waste management firm, in compliance with national and local regulations.

Waste transportation may be subject to ADR restrictions.

CONTAMINATED PACKAGING

Contaminated packaging must be recovered or disposed of in compliance with national waste management regulations.

SECTION 14. Transport information.

14.1. UN number.

ADR / RID, IMDG, IATA: 1263

14.2. UN proper shipping name.

Substances subject to the Stockholm Convention:

None.

Healthcare controls.

Workers exposed to this chemical agent must not undergo health checks, provided that available risk-assessment data prove that the risks related to the workers' health and safety are modest and that the 98/24/EC directive is respected.

VOC (Directive 2004/42/EC) :

Preparatory and cleaning - preparatory products.

| VOC given in g/litre of product in a ready-to-use condition : | |
|---------------------------------------------------------------|--------|
| Limit value: | 850,00 |
| VOC of product : | 710,00 |

15.2. Chemical safety assessment.

A chemical safety assessment has been performed for the following contained substances.

ETHYL ACETATE

HYDROCARBONS, C9, AROMATICS

SECTION 16. Other information.

Text of hazard (H) indications mentioned in section 2-3 of the sheet:

| Flam. Liq. 2 | Flammable liquid, category 2 |
|-------------------|--------------------------------------------------------------------|
| Flam. Liq. 3 | Flammable liquid, category 3 |
| Repr. 2 | Reproductive toxicity, category 2 |
| Asp. Tox. 1 | Aspiration hazard, category 1 |
| STOT RE 2 | Specific target organ toxicity - repeated exposure, category 2 |
| Eye Irrit. 2 | Eye irritation, category 2 |
| Skin Irrit. 2 | Skin irritation, category 2 |
| STOT SE 3 | Specific target organ toxicity - single exposure, category 3 |
| Aquatic Chronic 2 | Hazardous to the aquatic environment, chronic toxicity, category 2 |
| H225 | Highly flammable liquid and vapour. |
| H226 | Flammable liquid and vapour. |
| H361 | Suspected of damaging fertility or the unborn child. |
| H304 | May be fatal if swallowed and enters airways. |
| H373 | May cause damage to organs through prolonged or repeated exposure. |
| H319 | Causes serious eye irritation. |
| H315 | Causes skin irritation. |
| H335 | May cause respiratory irritation. |
| H336 | May cause drowsiness or dizziness. |
| H411 | Toxic to aquatic life with long lasting effects. |
