PRODOTTO

BRILLO WATER BASED (M8102)

CARATTERISTICHE

Brillo is a water based siliconic wax that increases and makes evenly polish marbles and granites. It fades away polishing differences that could be present on stones, covers abrasive signs and, at the same time, gives stain protection. Brillo has got an excellent waterproof capacity and is permeable to the vapor.

DATI TECNICI

Specific weight	995 ± 20 g/l	(MI 001)
Physical state	liquid	
Color	Light white	

STORAGE

Keep the container well closed and stored in a cool (temperature below 25°C) and ventilated environment for a maximum period of 12 months from the date of production marked on the tin. Avoid direct sun exposure.

SAFETY RULES

Keep the place ventilated while applying the product and when it dries. It is recommended the use of personal protective equipment during application. Read carefully the safety data sheet before application.

STORAGE

BRILLO is supplied ready-to-use, but it is possible to dilute it with water, alcohol or a mixture of these two solvents, but the best performances are obtained without dilution. Alcohol addition (ethyl or isopropyl) could be necessary to accelerate evaporation for particular applications. However preliminary tests are mandatory and it is advisable to not exceed 65% of dilution to not nullify the product action.

Application should take place on dry surfaces by using low-pressure airless spray gun, brush or roller: in any case take care to ensure an even application.

Preliminary tests shall determine the right quantity of the product to be used since that depends on the different material absorption. Once applied, allow it to dry for a few minutes, then wipe it with a dry and clean cloth for the finishing polish.

All surfaces not to be treated must be protected by plastic sheets.
