TECHNICAL DATA SHEET

Review 003, 05/2016

Page 1 of 1

PRODUCT

DRAI water based (M8118)

CARATTERISTICHE

DRAI WATER BASED is a hydroalcoholic solution used for the right treatment of marbles, granites and natural stones. Its fluorurided resin gives a high resistance against atmospheric agents and UV radiations. These particular features with the beautiful aspect of the package make the product ideal for the treatment dedicated to outer space. DRAI water based is a protective agent.

TECHNICAL DATA

Specific weight	995 ± 20 g/l	(MI 001)
Physical state	liquid	
Color	Light white	

STORAGE

Keep the container well closed and stored in a cool (temperature below 25°C) and ventilated environment for a maximum period of 12 months from the date of production marked on the tin. Avoid direct sun exposure.

SAFETY RULES

Ensure that work area is well-ventilated during application and until surface is dry. It is recommended the use of personal protective equipment during application. Read the safety sheet before application.

APPLICATION

We recommend to clean the surfaces before application, removing soluble salts, mold or loose parts. Application should take place on dry and cold surfaces which are not exposed to hot sun; low pressure airless paint sprayers as well as brush and roller can be used: in any case take care to ensure an even application until the material is completely soaked. Preliminary tests on a small area determine the optimal amount for application.
