PRODUCT

POLYESTERS COLOURING PASTES (M8142, M8143, M8144, M8145, M8146, M8147)

FEATURES

The pastes are dispersions of pigments into unsaturated polyester resins without styrene monomer. The coloring pastes packed in suitable tubes are used as additives in the mastic to achieve as much as possible the color of the natural stone. It is not indicated for epoxy systems.

TECHNICAL DATA

State	Viscous liquid	
Specific weight	1150 ± 20 g/ml	(MI 001)
Color	various	
Packaging	Tubes, small jars	

STORAGE

Keep the container well closed and stored in a cool (temperature below 25°C) and ventilated environment for a maximum period of 12 months from the date of production marked on the tin. Avoid direct sun exposure.

SAFETY RULES

During the application and drying time ventilate the room. We recommend the use of appropriate PPE during application. Before starting work read the safety data sheet.

APPLICATION

Add gradually the colouring paste to the mastic until reaching the wished hue; it is recommended for intermediate and very light shades. For a more correct dosage, prepare a more concentrated solution to be further diluted in the mastic. Then add the hardener and operate in the classic way.
