PIETRANTICA

PRODUCT

PIETRANTICA Antique finish (M8124)

FEATURES

PIETRANTICA is a mixture of acids in water, ideal in getting an antique look on any surface in stone, marble and limestone, it can be used both outdoor and indoor. **PIETRANTICA** gives to the marble a characteristic "oxidized" or "antique" look, from the first hand. Thanks to the fast corrosive action **PIETRANTICA** gives to the surface, where applied, drawings of high aesthetic importance. The ancient natural effect can be preserved and enhanced subsequently applying **DRAI** and /or **BRILLO**.

TECHNICAL DATA

Specific weight	1300 ± 20 g/l	(MI 001)
Physical state	liquid	
Colour	Clear	

STORAGE

Keep the container well closed and stored in a cool (temperature below 25°C) and ventilated environment for a maximum period of 12 months from the date of production marked on the tin. Avoid direct sun exposure.

SAFETY RULES

During the application and drying time ventilate the room. We recommend the use of appropriate PPE during the application phase. Before operating, read carefully the safety data sheet.

APPLICATION

Place the material to be treated in a horizontal position and pour **PIETRANTICA** on the surface. Wait at least 5 minutes and rinse thoroughly with water. Repeat the treatment if necessary.

It is difficult to calculate in advance the yield of the product because much depends on the porosity of the material to be treated and the final desired effect as well. However it can be assumed a yield of about 2/3 square meters per liter.

Note: If you want to get an intense result on the surface kindly repeat the treatment for a sufficient number of times. The product does not work on materials of siliceous nature such as granite.
