# TECHNICAL DATA SHEET

Review 001, 11/2018

Page 1 of 1

## PRODUCT

VIVO (M8163)

## FEATURES

VIVO is a product solvent-based which enhances the colour of marble and granite, developing a protective film and a light wet effect. The product can be applied on unpolished stones and provides good protection against moisture and oily liquids. VIVO provides long-lasting limitation of the water penetration in the walls and facades without blocking their breathability.

## TECHNICAL DATA

Appearance	Liquid	
Specific weight	960 ± 20 g/l	(MI 001)
Odour	Aromatic smell	
Colour	Transparent slightly yellow	

## STORAGE

Keep the container well closed and stored in a cool (temperature below 25°C) and ventilated environment for a maximum period of 12 months from the date of production marked on the tin. Avoid direct sun exposure and to heat sources.

## SAFETY RULES

Keep the place ventilated during application and drying processes. The use of personal protective equipment is recommended during application. Read carefully the safety data sheet before application.

## APPLICATION

**VIVO** is ready to use.

Clean and dry very well the surface to be treated (after rain wait at least 24 hours) and spread VIVO evenly, by means a roller, a brush, a sponge or a low pressure spray gun. Do not use more product than the stone can absorb, otherwise it forms a superficial sticky film.

It is appropriate to repeat the application after 15 minutes.

The surface will be dried after 2 hours from application and walkable after 2 days.

Treatment of only small areas and a preliminary test on hidden part of the stone are highly recommended.

Close the tins well sealed as soon as possible to avoid the drying of the product.

To the treated surface cleaning do not use acidic or alkaline chemical detergents.
